1. According to one legend, the Condessa de ___, wife of the Viceroy of Peru brought to Europe the bark from which quinine was extracted after having herself benefited from its effects. In 1742, Linnaeus named the tree in her honour. Researchers now believe that she never suffered from malaria herself nor actually consumed the drug. Fill the blank or provide the name given by Linnaeus.
2. What is travel writer Jonathan Raban describing in the lines that follow: "It begins in the mountains of Turkey and ends in a brown bog at the neck of the Persian Gulf...it's the town drain of Asia Minor and one of the two oldest superhighways of the world. It is an Arab river with a Greek name, meaning 'of good fellowship'"?
3. What do Ernest Hemingway, Eric Linklater, Susan Ertz, Dorothy Sayers, Agatha Christie, Beverley Nichols, E. H. Young, Mary Webb, Compton Mackenzie and André Maurois have in common, especially in connection with the year 1935?
4. Early in 2006, this director shot an ad for American Express featuring himself as restaurant patron who looks on while strange things happen around him - such as a woman snaring a fly with her tongue and fellow-diners disappearing like shattered glass. Who?
5. Atlantic Magazine sponsored French philosopher Bernard Henri Levy's journey through America chronicled in the newly-released book American Vertigo. This was a retracing of another Frenchman's ramble through America (1831-32) which resulted in a famous book. The trip was done in honour of the latter's 200th birth anniversary. Name this famous Frenchman.
6. This work was a tongue-in-cheek submission to a 1917 American art-show whose rules said anything would be accepted. When the organizers rejected it, the artist responded with the words "That is absurd. The only works of art America has given are her plumbing and her bridges." Identify artist and work.
7. The German term for punish was used a lot in their World War I propaganda posters against England. It later became a verb in the English language meaning "to attack using an aircraft's machine-guns/cannons". What term?
8. This desert takes its name from the Uighur word for 'labyrinth' and is famous for its karaburan or 'black sandstorms'. So feared were they that the ancient Silk Road actually forked at the eastern edges of this desert so as to avoid them and joined up again on its Western periphery. The Chinese nuclear-testing facility Lop Nor lies on its western edge. Identify.
9. Ossetra and Sevruga are two well-known varieties of this coveted culinary item which takes its name from a Turkish word. The third and best-known variety takes its name from the Russian word for 'white'. Interestingly, this term is also applied to the white whale in these parts. Russia and Iran dominate trade in this item. Name both the general term and the best-known variety.

0
10. In India, we tend to use this seven-letter word without the prefix motor, unlike in the West. English dictionaries tend to define the word - as we use it - differently. It is glossed as 'a child's toy, consisting of a long foot-board between two small end-wheels' or as a 'flat-bottomed sailboat with runners for skimming over water or ice'. What word?

0
11. The origin of this phrase, meaning 'to make up one's mind to go through with an unpleasant situation or experience', dates back to the days when the wounded had to be seen to without the benefit of anaesthetics or painkillers. The victim would be given an object that would help him brace himself against the coming pain. What phrase?
12. The name of this plant is Malay in origin and is thought to be an imitation of the explosive sound produced when it is set on fire - the means normally used to bring down giant specimens. The air trapped within the base of its hollow trunk expands till it blows free. The presence of this plant is also linked to the development of the 'chopper' cultures of South-East Asia as opposed to the 'hand-axe' cultures in other parts of the continent. What plant?
13. What annual observance begins at the village of Erumeli and continues for about 61 km northwest - a journey of about 4 days on foot?

0
14. When she began research in Berlin in the early 1900s, she found herself at the receiving end of so much prejudice from male scientists that she was forced to work from an old carpentry shop. In 1918, she discovered protactinium in collaboration with Otto Hahn. She was forced to leave Germany for Sweden after the Nazis came to power where she continued her research into fission. In 1997, the IUPAC formally approved the naming of element no. 109 in tribute to her. Who?

0
15. The name for it is derived from the Greek phrase meaning 'under one'. Conventionally used in yoking two words or two halves of the same word separated by lineation. Also used in compound nouns when they perform an adjectival function. What?

0
16. This Indian performer works under a double-barrelled surname that acknowledges both her parents - one a famous Indian writer, the other a famous academic. Her recent filmography includes The War Within, Marigold, The Forest etc. She also scripted the film Forever. Identify.

0

0
17. Born 1812, died 1888. Visited Italy, Sinai, Suez, Albania, Malta, Corfu, Crete, India and Ceylon before building a house in San Remo, Italy, where he spent the last years of his life with his cat, Foss. Wrote five books of verse, seven of travel and three of biology. Auden, who admired him, has a poem in his honour, describing him as "a dirty landscape painter who hated his nose". Who?
18. This term originated in the US Navy as the description of a group of ships assembled for a specific operation or purpose. It is now applied to any group with a specific job or focus. What muchabused two-word phrase?

17. Edward Lear
18. Task force
19. During the Middle Ages, the economic importance of this particular sea-food rivalled that of spice. The scarcity of this item caused the first ever maritime fishing rights agreements to be negotiated between nations. The need to organize trade over this commodity is also said to have brought the Hanseatic League into existence. Traditionally found in the North Sea, the Baltic, the Irish Sea and the Atlantic off the coast of Norway. It is a key ingredient in both the Russian zakouski and the Swedish smorgasbord. Identify.
20. These two English words were once used in Norman French to represent movable property and derived their origins from the Latin capitale. They are essentially doublets - words that once meant the same thing but now have different spellings and associations. One refers to domesticated animals while the other refers today both to any movable property as also to a slave. Provide the latter word.
21. This literary work begins with a description of the Black Death which hit Florence in 1348 and leads into an introduction of a group of seven young women and three young men who flee from Florence to a villa outside of Naples. To pass the time, each member of the party tells one story for each one of the ten nights spent at the villa. In this manner, 100 stories are told by the end of the ten days. Identify the work.
22. In 2005, researchers at the Memorial Sloan-Kettering Cancer Center in New York have changed the name of POK erythroid myeloid ontogenic gene (a gene found to cause cancer) to the more unobtrusive Zbtb 7 due to legal pressure from which company?
23. The success of a prior operation at Durango on 31 March 1937 compelled Col. Von Ricthofen to authorize this operation on 26 April of the same year. The new operation was carried out using 3 Junker 52 squadrons and one Heinkel 111 squadron and was spectacularly successful, owing perhaps to the fact that the date chosen was market day in the target area. What are we talking about?

0
24. This Flemish stew takes its name from the French word for 'to shake together' and was normally prepared by boiling oxtail, breast of beef, or pig's ears and tails with leeks, potatoes, cabbages, carrots and onions. The chaotic nature of its composition has caused this name to become an adjective denoting a careless mixture. Identify.

0
25. Ernest Lehman, who wrote North by Northwest and Sweet Smell of Success, scripted this film based on a 1956 Broadway musical, based in turn on a 1949 autobiography. Legend has it that Burt Lancaster ran into Lehman at the Fox commissary at around this time and exclaimed "Jesus, you must need the money", when he heard what his friend was up to. In Hong Kong, this movie bears the title Fairy Music Blow Fragrant Place, Place Hear. Identify movie.

0
26. The Wildflower Hall in Shimla is a luxury resort operated by the Oberoi Group. Situated at an altitude of $2,550 \mathrm{~m}$ and surrounded by 22 acres of cedar and pine forests with breathtaking views of the Greater Himalayas, it was the residence of the person who was Commander-in-Chief of the British Army in India from 1902-1909. Who?
O , 27. For winning the Ansari X Prize, SpaceShipOne had to reach an altitude of 100 km , which is the boundary of space as defined by the Fédération Aéronautique Internationale. This altitude is called the $\qquad$ Line in honour of the aeronautics pioneer who proposed it in the 1950s.
28. If Helsinki (Finland), Poprad-Tatry (Slovakia), Zakopane (Poland), Klagenfurt (Austria) and Sion (Switzerland) lost, which city won?
32. She was one of the first notable women in mathematics and is believed to have invented the astrolabe and the hydrometer. Carl Sagan, Charles Kingsley and Habib Tanvir have written about her. Who?

0
33. Novax, Rickenbacker, Washburn, Steinberger, Ibanez, Höfner, Gibson, Gretsch etc. are manufacturers of what item?

0
34. The French word for foot-soldier today refers to anybody who is the first to settle a region or enter a field of enquiry. In ancient times, these soldiers would be sent ahead of the troops with spade and pick to set up camp for them - which is how the present sense of the term originates. What term?

0
35. This Nobel laureate was the first to prove that Greenland is covered by a single ice-sheet. His observations of Eskimo Life, made while trekking across Greenland, were later published to much acclaim from anthropologists. He designed a unique craft to which he gave a name meaning Forward in the local language. He did much work towards explaining wind-driven sea currents and improving the design of several oceanographic instruments. He is also famous for a paper on the histology of the Central Nervous System and for being a moving force in the separation of Norway from Sweden. Who?

0
36. On winning the Academy Award for the Best Actor in a leading role for this movie, William Holden gave one of the shortest acceptance speeches -- "Thank you." Identify this 1953 movie, set in a WWII German POW camp, and based on a play by Donald Bevan and Edmund Trzcinski.

61. Her real name is Nilanjana Sudeshna. A schoolteacher, who found her given name too long, used her nickname instead and it stuck. She wrote under that name; her first work has a character who was supposed to have a "good name" sent by his grandmother in India which gets lost in the mail. Who?
62. Which popular tourist attraction is said to have been brought to Kochi by the mariner and explorer Zheng He in the 15th century?
63. With which rock group would you associate the names Derek Smalls, Nigel Tufnel, David St. Hubbins, Joe Besser and Mick Shrimpton?
64. These troops were proud of the fact that they were the best-fed troops in the empire. They referred to themselves as the ocak (hearth or fireplace); their symbol was a sacred cooking cauldron. Their ranks were organized on culinary terms; among the terms they used to represent their individual ranks were çorbaci (soupmaker), asçibasi (chief cook), gözlemici (pancake maker) and çörekci (cake maker). Who?
65. What started with the Battle of Cadsand in 1337 and ended with the Battle of Castillon in 1453 ?
66. This corporate buzz word has sometimes been a victim of 'political correctness' and has been banned in multiple organisations because it is deemed offensive to sufferers of epilepsy. Identify this technique said to have been originated by Alex Osborn (the ' $O$ ' in the advertising agency BBDO).
67. What 1830 invention by Edwin Beard Budding, inspired by a tool used in mills to give a smooth finish to woven cloth, is used extensively at Wimbledon and other such venues?
68. He discovered the urea cycle in 1932 and the citric acid cycle in 1937, and was awarded the Nobel Prize in Physiology/Medicine in 1953. Who?
69. Which television series uses the tag line "Everyone has a little dirty laundry" and has many of its episode titles derived from songs by Stephen Sondheim?
70. This term was borrowed by Max Weber from New Testament Greek, where it simply meant 'the gift of grace', and introduced into sociology to refer to the extraordinary quality possessed by people who are natural leaders or such a quality conferred by the office one holds. What now-imprecisely used term are we talking about?
71. Born in Almora, India. His desire to take up a career in the arts was thwarted by his father, an Army officer who insisted that he should join the Indian Medical Service. He completed the research that made him a household name in 1898, dabbling all the while in mathematics. His best-known work in that field, titled The Algebra of Space, is said to anticipate the work of A. N. Whitehead. Who?
72. The pseudonym assumed by Vyacheslav Mikhailovich Skryabin for political work derived from a Russian word meaning 'hammer'. The name attained infamy during the Winter War of 1939 when the Soviet Union crossed the Mannerheim Line. What was the pseudonym?
73. According to mythology, the fruit of which tree is supposed to have got its current colour from the blood of Pyramus?
74. This overseas territory of the UK was named Las Tortugas by Christopher Columbus after the seaturtles found there in abundance. Its current name is believed to have been given by Sir Francis Drake, after a Carib term for crocodile. Identify this place where more than 70,000 companies are registered.
75. In mathematics, it is a matrix with one row or one column. In biology, it is an organism, typically a biting insect or tick, that transmits a disease or parasite from one animal or plant to another. It is also a well known term in high school physics. In many programming languages, it denotes a onedimensional array. In aeronautics, it is the course or compass direction of an airplane. What?
76. Which dry red Italian wine produced in Tuscany (and named after a mountain range) is usually identified by its squat bottle, enclosed in a straw basket, called fiasco?
77. Which work, initially published as Cynic's Word Book, has "abundant illustrative quotations from eminent poets, chief of whom is that learned and ingenious cleric, Father Gassalasca Jape, S. J."?
78. Which fictional character's birth name consisted of 9 names from which he dropped the last seven because their initial letters formed the word "pinhead"?
79. It has the lowest coefficient of friction of any known solid material and is used in bearings and gears. One of its first advanced uses was in the Manhattan Project to coat valves and seals in the pipes holding reactive material. What is its common name?
80. What idea was proposed by Michel Bréal in 1896 based on a legend whose earliest citation appears in Plutarch's On the Glory of Athens?
81. As part of which annual award does the winner get a bronze medallion based on the designs of Louis H. Sullivan - with the winner's name inscribed on one side, and on the other side, the words "firmness, commodity and delight"? It was won by Paulo Mendes da Rocha of Brazil in 2006.
82. Which sect, whose official name was Al-da'wa Al-jadda (meaning 'the new doctrine'), was destroyed by the Mongol warlord Hulagu Khan during the assault of Alamut in 1256 ?
83. What name has been given to the recently discovered satellite of the Trans-Neptunian planetoid, Xena, the "10th planet"?
84. Connect Videocon, Exide, Pepsi, Reebok, Bharat Petroleum, Mysore Sandal Soap, Brylcreem, Orient and Reliance.
85. Which pass in Ladakh, en route to Siachen, is described as 'the world's highest motorable pass'?
61. Jhumpa Lahiri

109. Lord Meghnad Desai and his wife Kishwar Ahluwalia are collaborating on the biography of an actress whose mother was also a well known director and owned a studio. Name the actress.
110. $\qquad$ recently spurned the Rock and Roll Hall of Fame with a faxed letter to the organizers saying "We're not your monkey. Next to the $\qquad$ the Rock and Roll Hall of Fame is a piss stain." Which super-group?
111. A word meaning 'worm-shaped' is normally used in association with this part of the body. It is found only in anthropoid apes, some rodents, and marsupials such as wombats and opossums. Once thought to have no function in the human body, it is now understood to function as a lymphoid organ, thus playing a role in foetal immunity and in immunity for young adults. Give its full name for full points.

108. Saif Saaeed Shaheen
109. Nargis Dutt
110. Sex Pistols
111. Vermiform Appendix
112. The seaweed kombu has been used in Japanese cuisine for hundreds of years now. In 1908, the active ingredient in kombu was isolated and commercial production began shortly after. This active factor is said to stimulate receptors for umami - the 'fifth' taste identified by Ikeda - a savoury, broth-like, meaty flavour, thus signaling the presence of proteins to the digestive system. Identify the active factor.
O , 113. They first met at an earthquake benefit in January 1944. He was 48, she was 24. Their first conversation apparently went thus: "Colonel!" "What is it, my girl?" "Thank you for existing!" This kick-started two careers for the lady, including one in films. The kindest thing ever said about her acting style was that it was 'discreet'. This barely-literate woman had an autobiography ghostwritten for her - the title, My Reason For Living, was, quite appropriately, the slogan by which she referred to this colonel who was twice her age. Name the lady.
0
114. Which Indian organization's logo is a flame held up by a pair of hands?
115. According to one apocryphal story, his very last act was performed in the service of science. Prior to his execution in 1794, he asked friends to observe for how long he continued blinking after being beheaded. It was noted that his eyes continued to blink for a good 15 seconds after the deed was done. Who?

0

0
0 118. Amitabh Bachchan has acted in two movies with the same title, but with very different story-lines and released 29 years apart. What title?
O , 119. The origins of this 900-mile-long overland route go back to 1821 when a desperate speculator named William Becknell set out with commodities to be sold at The City of Holy Faith of St. Francis. The route he discovered soon became a trade lifeline and also made the reputations of adventurers like J.C. Fremont, Wild Bill Hickok and Kit Carson. Fort Leavenworth was put up to protect it while Dodge City became important because of its strategic location astraddle the route. Identify this route that took its name from the city where it ended.

0
120. While the term Canaanites is sometimes used in reference to this ancient people, the more familiar term is derived from a Greek word meaning Red People. The Greek term owes its origins to the prized reddish-purple cloth exported by this civilization. They are said to have dominated the Mediterranean from the ninth to the sixth centuries BC, establishing colonies from Cyprus in the East to Spain and North Africa in the West. They are also considered the inventors of the alphabet used across the West today. Which civilization?

O , 121. The climax of this 1999 film is a race where the first prize is two weeks at a summer camp. Ali tries his hardest to come third because that prize is a pair of new sneakers which he can give his sister Zahra. Identify film.
O 122. Vidar and Vail, Vili and Ve, Magni and Modi, Hoenir and in some versions, a resurrected Baldur were the only survivors of which event in mythology?

0
123. This piece of music was composed in 1913 by Daniel Alomía Robles and appears in the finale of a Peruvian musical play whose libretto was written by Julio de La Paz. In 1993, it was declared an official part of Peru's cultural heritage. Identify this piece, made famous by a 1970 song.
O 124. Which Indian novelist made his film debut as a retired clerk whose dreams of a house are put paid to by a property-developer (played by Amjad Khan) and his slick lawyer (played by Naseeruddin Shah) in the film Mohan Joshi Haazir Ho?

0
